

Change Video Settings for iOS

Settings screens will vary slightly depending on which model of iPad or iPhone you are using, however the instructions are the same.

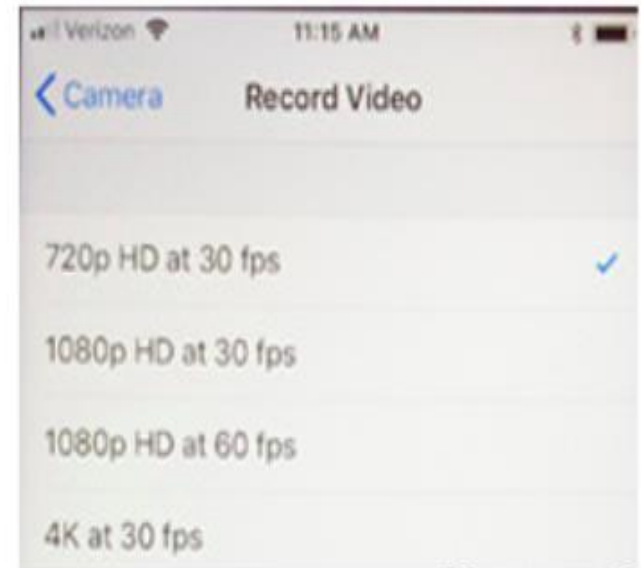

1. Open Settings from your iOS device and tap the Camera settings.
2. Select **Record Video**.
3. Then select the video size of **720p**

Step 1

Step 2

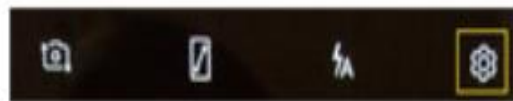

Step 3

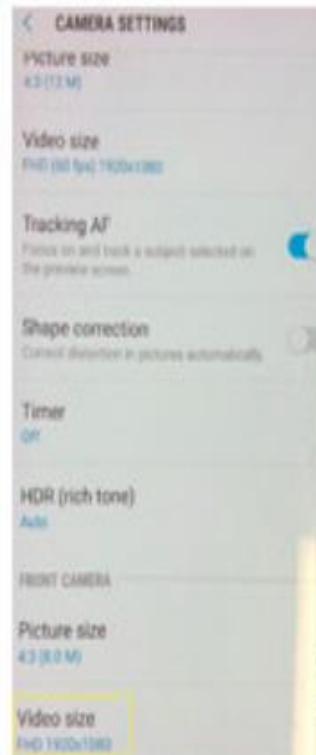

Change Video Settings for Android

Settings screens may vary slightly depending on which model and Android version you are using, however the instructions are the same.

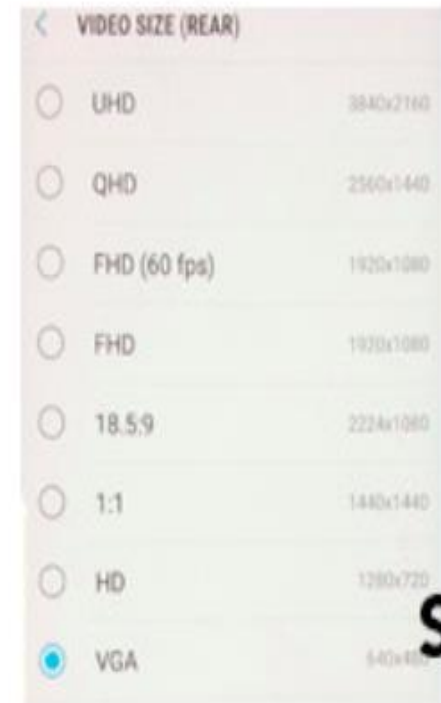

1. Open Settings from your Android device and tap the Camera settings.
2. Select the **Video Settings** option.
3. Then select the **Video Size**. Select a size less than 720p. Some devices may show a size of 640x480
